Dear Parents and Caregivers,

Today at school, your child participated in the program, **Healthy Eyes Healthy Futures**. The **Healthy Eyes Healthy Futures** program focuses on supporting families in eye care by partnering with school nurses, parent coordinators, social workers, and other school partners.

Your child was screened at school for vision problems. **As a result of not passing their vision screening, your child is being referred for a professional eye examination.** Please make an appointment with your eye doctor or primary care doctor for a vision exam as soon as possible. Your child learned about eye health and “promised” to take care of his/her eyes by visiting an eye doctor. Your child was encouraged to share this information with family and friends so they can take care of their eyes, too.

According to Prevent Blindness Wisconsin, one in four children has an unknown eye problem that can create problems with the ability to read and learn. That’s why **Healthy Eyes Healthy Futures** is here to support you in getting your child to eye care. Now it’s your turn as parents and guardians to make the “promise” and include **Healthy Eyes Healthy Futures** as part of your family’s health and wellness routine!

If your insurance coverage does not include vision exams and glasses or if you do not have health insurance, please call the nurse at your child’s school to receive valuable information regarding a vision care voucher or other resources in your community.

**Healthy Eyes Healthy Futures** is here to support you and your child. Let’s make a difference in your child’s sight today!
