

INTRODUCING THE GAME TO YOUR CHILDREN

Dear Teachers,

Before your vision screening, it is important that you:

- Explain and practice the game with the children one week before your screening.
- Approach the activity as a GAME, not a test.

The Picture Game

1. To play, the child just names the pictures they are shown.
2. Together with the children decide what to call the pictures.
You might pick: SQUARE HOUSE APPLE BALL
3. Give each child a turn to tell you the name of each picture.
4. Explain that the screener will gently cover one eye at a time with a pair of glasses so that each eye gets to play the game alone.

NOTE: During the screening, children who are shy or hesitant can point to a matching picture.
