Magic/Happy Feet Pattern

This pattern may be reproduced provided that it will not be sold. Trace or mount the feet onto a durable material such as contact paper, heavy cardboard. Laminate the paper or cardboard so the feet withstand many screenings. Tracing the pattern on floor tile squares also provides durable happy feet. Some screening teams decorate the feet to make the “game” fun for small children. Align the feet comfortably side by side with the heels 10 or 20 feet from the chart, as determined by the chart selected.
