You know the sun can damage your child’s skin… but what about her eyes?

The sun’s UV rays can damage your child’s eyes and cause serious vision problems later in life.

HOW CAN I PROTECT MY CHILD’S EYES FROM THE SUN?

• Have your child wear a brimmed cap and sunglasses when outside.
• Be sure to purchase polycarbonate-lens sunglasses labeled to “absorb 99-100 percent of UV-A and UV-B rays.”

For more information about selecting the best UV protection for your child, visit preventblindness.org/wi or ask your eye care professional.
