

# VISION MILESTONES

8 Months - 12 Months

## 8 MONTHS - 12 MONTHS

As a parent or caregiver, it is important to know that healthy vision plays a role in a variety of aspects throughout life

### Helpful Tip

To assist with meeting these milestones, look at a high contrast book with baby

8

Baby is able to recognize family and/or caregiver's face

9

Baby is able to recognize small objects

10

Baby can point to pictures in books

11

Baby looks for small objects

12

Baby looks for objects dropped in a container

\*Milestones can vary up to six weeks

\*At any time, if you have a concern contact your pediatrician
