

VISION MILESTONES

Birth - 3 Months

As a parent or caregiver, it is important to know that healthy vision plays a role in a variety of aspects throughout life

Helpful Tip

Hold a colorful toy 8 to 15 inches away from baby's face. Slowly move the object back and forth.

BIRTH - 3 MONTHS

1

Baby begins to focus on parent's face

2

Baby makes eye contact with caregiver

3

Baby has a social smile and follows parent's face

*Milestones can vary up to six weeks

*At any time, if you have a concern contact your pediatrician.
